Key benefits

We love our backyards. It's where our families relax, entertain, cook and enjoy our little piece of paradise. It's no wonder they add significant value to a home. But they can be a lot of work. Too many pool owners accept that heating a pool has to be expensive, cleaning the pool takes hours and pulling the old-fashioned bubble plastic cover off the pool is a necessary evil. With Remco, it's easy.

SAFETY

Securely fixed into two parallel tracks, the Coverstar glides out to cover your pool and provide a secondary layer of protection to prevent children and pets from falling in. Fully extended, Coverstar pool covers have a load rating of 400kg, giving you extra peace of mind so you can fully enjoy your pool.

SAVE ON HEAT, WATER & ENERGY

Coverstar pool covers eliminate 90% of evaporation, saving both water and pool chemicals and stabilising your pool's temperature. By helping maintain consistent chemical readings, the lowest possible chemical and energy costs are ensured. If a pool cover is frequently used, filtering cycle times can be reduced by over 50%.

FULLY AUTOMATIC OPERATION

Coverstar is fully automatic, making opening and closing the cover effortless. No more dragging a heavy cover off the pool manually, which means more time for you and your family to enjoy your pool.

5 YEAR WARRANTY

With over 30 years experience in Australian pool covers, products and accessories, Remco has always been at the forefront of pool technology, innovation and quality. All our pool covers come with a 5-year parts domestic warranty.

LOCKABLE KEY SWITCH

Every Coverstar pool cover is installed with a lockable key switch as standard, providing ease of use, security and extra safety. Alternative security activation options include our lockable toggle switch and a keypad security controller that requires a code.

A Coverstar to suit every pool

If you're in and out of your pool all the time, Remco Coverstar is for you. A fully automatic vinyl pool cover system providing safety, minimal maintenance and is easy to use.

RECESSED COVERSTAR SYSTEM

With the Recessed System, the roller is fitted in a dry pit immediately behind the pool. Perfect for rectangular pools, this system offers three pit lid options.

PIT LID OPTIONS FOR RECESSED COVERSTAR

ALUMINIUM LID – NON-TRAFFICABLE

FLAT LID – TRAFFICABLE

FLUSH DECK BRACKET SYSTEM

Trafficable and completely integrated for a seamless aesthetic. Suitable for pavers, tiles and decking.

*In Australia at this time Coverstar Pool Cover Systems do not replace the need for a security fence around your pool. Parental supervision is always recommended for children in the vicinity of any body of water. Coverstar is not to be relied upon as a safety cover.

Installation

DECK MOUNT COVERSTAR SYSTEM

With the deck or paving mount system, the roller is fitted on top of your deck or paving. The cover can be installed without a housing or within a Remco aluminium bench seat. This is perfect for existing freeform or geometric pools.

ALUMINIUM HOUSING OPTION

Remco offers an optional anodised aluminium housing for complete coverage of the mechanism.
